TourGuide**Pro**

Professional real-time audio streaming for tour guides.
Your voice — live on every tourist's phone.

WHAT IS TOURGUIDEPRO?

TourGuidePro is a web-based platform that lets any professional tour guide stream their voice in real time to all participants — with sub-second latency, 48 kHz audio quality, and zero hardware required. No radio transmitters. No receivers to hand out. No app to install.

Tourists simply scan a QR code with their phone camera and they are instantly connected — listening live through their own earphones.

HOW IT WORKS

1. Guide opens a room
Log in, create a room — a QR code is generated instantly.

2. Tourists scan the QR
Any smartphone camera opens the listening page directly. No app download.

3. Guide goes live
Press Start and your voice streams in real time via WebRTC.

4. Tourists listen
Crystal-clear 48 kHz audio through their own earphones, with sub-second latency.

KEY FEATURES
